c. Service coal stocks increased and have at present reached a new high. The shortage of coal therefore, seems to have been overcome. The fact that trains are still roported to have been cancelled due to shortage of coal can be explained by only a certain amount of coal being roleased for operational purposes. The larger part of the secumilates stocks is kept as an untouchable reserve. Only the transportation admiristration of the SEA may dispose of these supplies. Host of the service coal is still lights.
